# Power Wind Ltd Pre Launched India's Highest Capacity Wind Turbine PW 100 of 2.5 MW at 8th Renewable Energy India Expo *by Ginni Bharti*

in [Business](#) / [Sales](#) (submitted 2014-09-05)

Power Wind Ltd Pre Launched India's largest capacity Wind Turbine at India Expo Centre PW 100 of 2.5 MW wind turbine manufactured by Power Wind Ltd remained the most eye catching product at the India expo Centre.

"India's highest capacity Wind Turbine PW100 with 2.5 MW received incredible response at Renewable Energy India Expo 'says MD of Power Wind Ltd-Mr Raj Kumar Yadav

Greater Noida, 3rd -5th of Sept'14: Power Wind Ltd. participated in the 3-Day 'Renewable Energy India Expo' for the first time organized by UBM with overwhelming response at India Expo Centre with a Grand Pre Launch of its new product PW 100 ( India's biggest Wind Turbine) with 2.5 MW. The product was showcased LIVE on a truck and witnessed by more than 500 visitors including top notch CEO'S, bureaucrats, scientists, MD'S, Directors, its stakeholders, competitors, research enthusiasts, manufacturers, suppliers, end users etc.

Visitors commented that the display of Wind Turbine was the most remarkable one. It also proved to be a golden opportunity for the marketers who wanted and were looking to invest in latest and newest version of Wind Turbine. It was showcased beautifully in a truck with all its equipment.

Vice Admiral Paras Nath expresses his views saying that " Energy crisis is a world war in developed countries. The consumption is increasing day by day in India we are not able to meet the bare minimum requirements hence Government is encouraging in all way for Power Generation. Whilst all other forms of Energy be it Hydro or Nuclear based, they are either limited in resources or too expensive to launch. Therefore the need of the hour is to go in for Renewable Energy for Wind or Solar base. PowerWind has only supplied its state of art Turbines to eleven different countries and the requirement is further growing within India. PowerWind has its presence in Maharashtra and soon going to be launch in Tamil Nadu."

### Brief About the Company:

PowerWind Ltd. has been established in 2007 with objective of addressing the needs of the growing wind energy market in India and overseas by the way of supplying cost competitive wind energy equipment. POWERWIND LTD has a wide range of Wind Electric Generator (WEG) ranging from 500KW to 2.5MW. The company plans to progressively increase its assembly capacity starting with 100 machines initially to almost doubling the output in 3 years time.
